

# Your Smile Journey **starts here**

Everything you need to know before starting Invisalign treatment.

**invisalign**<sup>®</sup>

# More than **20,000** **straight smiles** speak for themselves.

The MiSmile Network is one of the largest networks of orthodontists and dentists specialising in the Invisalign System. **We've created more than 20,000 straight smiles in the UK alone.**

Over the following pages you'll discover why more than 13 million people worldwide have chosen Invisalign to create their perfect smile.

Most importantly, you'll see how, with a little help from Invisalign clear aligners, a new smile can help change everything.

# The MiSmile Network

We are part of a revolution in orthodontics, helping people achieve their new smiles discreetly and confidently with clear aligners.

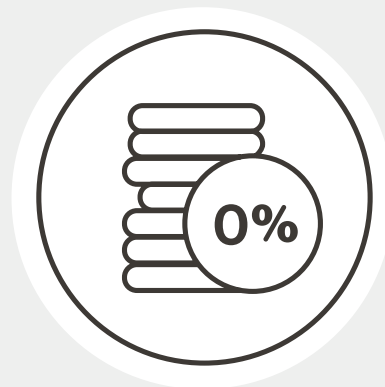

We offer much more than just treatment for straighter teeth. Your Invisalign journey with us includes a free initial consultation, special offers, and a tailor-made treatment plan created using the latest in dental technology.

## Included in your Invisalign package:

### **FREE Consultation**

Your first consultation is free, with no-obligation.

### **0% APR**

Interest-free finance available over 12 months.

### **FREE Retainers**

Vivera retainers are included with your Invisalign package.

### **FREE Whitening**

Teeth whitening included with your Invisalign package.

At participating practices. Based on your personalised treatment plan, terms and conditions may apply.

# 5 reasons to smile with

1

## **Customised**

Invisalign treatment is tailored to you. A series of comfortable, removable clear aligners will be created just for you, to your unique dental profile and agreed treatment plan.

2

## **Removable**

Your Invisalign aligners are completely removable, so you can take them out to eat, drink and clean your teeth. You can even remove them for special occasions, like a job interview or party, although you'll be surprised how few people notice you're wearing them.

3

## **Comfortable**

Invisalign aligners are designed to be comfortable to wear. There are no metal wires or brackets that could potentially irritate your mouth or gums.

4

## **Nearly invisible**

Creating your new smile can be your secret. Invisalign aligners are nearly invisible, so no one will know you're having treatment.

5

## **Effective**

Even before your Invisalign treatment is finished you'll notice the difference. Your smile will start improving from the moment you wear your first aligner.

# iTerо®

The iTerо Scanner enhances your experience and elevates clinical precision. iTerо technology means we can take a 3D digital scan of your teeth, so there's no need for messy, imperfect dental impressions.

# Your Smile Simulation

See your future smile before committing to treatment.

**With simple scan and see technology, we'll create your personalised smile simulation in just 10 minutes!**

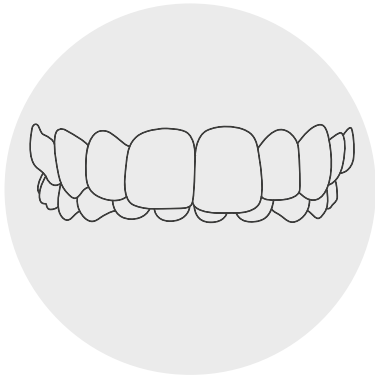

You can see exactly how your teeth will move to your new straight smile with Invisalign aligners, before you even start treatment.

# Can Invisalign work for you?

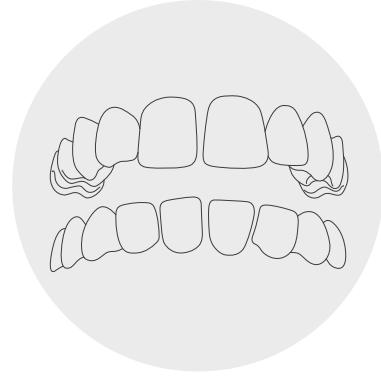

Invisalign can treat many orthodontic issues, ranging from minor tooth movements to more complex cases. Whatever the problem, the result is a new, more even smile that you'll want everyone to see.

Here are some of the orthodontic issues that can be treated with Invisalign.

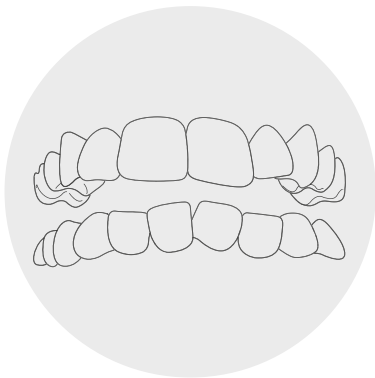

### **Deep bite**

Deep bite can lead to gum problems or irritation, and/or wear on the lower teeth, and can cause painful jaw and joint problems.

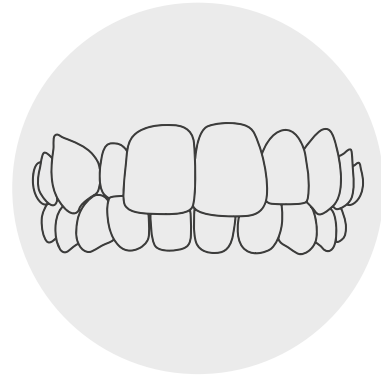

### **Gapped teeth**

Spacing issues and gaps between teeth can lead to gum problems (due to lack of protection by the teeth), periodontal pockets and increased risk of periodontal disease.

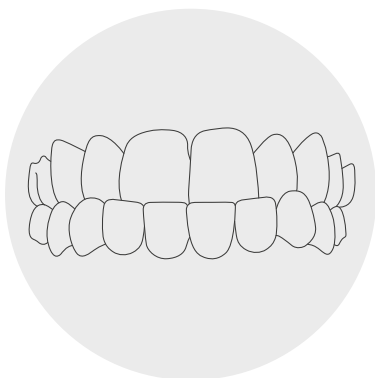

### **Crowded teeth**

Crowded teeth can get worse over time, and result in severely crooked teeth. Crowding can lead to plaque accumulation, tooth decay and an increased chance of gum disease.

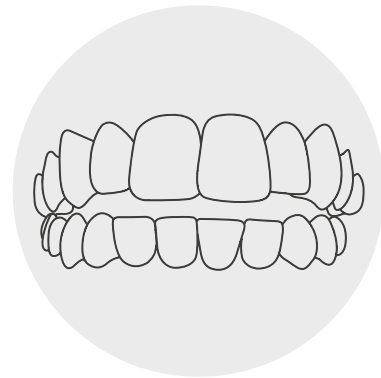

### **Crossbite**

Crossbite causes one or more of the upper teeth to bite on the inside of the lower teeth. This can cause wear of the teeth, gum disease and bone loss.

### **Underbite**

Underbite can prevent the normal function of the front teeth or molars, which can lead to tooth wear. It can also cause painful jaw and joint problems.

### **Open bite**

Open bite can cause poor or painful chewing, and even speech impairment. It can also lead to greater issues like temporomandibular joint disorder (TMJD).

# The path of a typical Smile Journey:

1

## Free Consultation

Meet with your local MiSmile Provider to discuss if you are eligible for treatment. They will take photos, x-rays and digital scans, or a dental impression, of your teeth.

View your Smile Simulation before you start treatment.\*

## Treatment begins

Your records and scans will be used to create a ClinCheck® 3D treatment plan, just for you. Then your custom-made aligners will be delivered to your MiSmile Provider, where you can pick them up and start treatment.

Wear your aligners every day and change them at home – on average, every 1-2 weeks.

2

3

## The occasional checkup

You'll visit your Provider around every 6-8 weeks to monitor progress and receive new aligners.

After finishing your treatment plan, you'll receive your retainers to maintain your new smile.

\*At participating practices.

# Before and after Invisalign treatment

# Frequently asked questions

## **How does Invisalign treatment work?**

Invisalign uses a series of near-invisible aligners to gently move your teeth into position. As you replace each aligner, your teeth will move little by little, week by week, into your straight, confident smile. As the aligners are removable, it's easy to maintain your regular oral hygiene routine, take them out for special occasions, and enjoy your usual diet.

## **What are the aligners made from?**

Aligners are made from a medical-grade thermoplastic material uniquely developed for the Invisalign System.

## **Is Invisalign treatment painful?**

Some people may experience temporary, minor discomfort for a few days, at the beginning of each new stage of treatment. This is normal and is actually a sign that the aligners are working. This discomfort typically disappears in 1–2 days.

## **How much does treatment cost?**

As with many orthodontic treatments, the cost will depend on the individual case. We will be able to let you know your exact treatment cost at your free consultation. As a guide, if only minor treatment is required, your brand new smile could cost as little as £1,700.

## **How long will treatment take?**

Again, this will depend on the individual case, but treatments typically take between 9 and 18 months.

Everyone's Smile Journey is different. Simpler cases will take less time than more complex ones, and each treatment is custom-made for you. However, what always remains the same is the final result: **a more confident, happy smile.**

**Would you like to see how your new smile could look before starting treatment?**

With digital scanning technology you can see your Smile Simulation in 3D at your free consultation appointment.
